

The Importance of eDiscovery in the Digital Age

There is no doubt that technology has changed our world and the amount of data now available has completely changed the legal system. With access to so much information, it's imperative to efficiently understand and consider all of the possible evidence in your litigation and present it effectively. Litigation and eDiscovery services are more important now than they ever were before. As the Digital Age expands and data is created in masses, make sure you have the right eDiscovery team on your side.

Data

can be identified and culled at early stages during litigation

95%

of all corporate documents are stored in electronic form

Emails sent/received per day = 205.6 billion

Percent of emails that are spam = 66.34%

DATA RESIDES ALL AROUND US

A 500 GB hard-drive can easily hold more than 30 Million pages

64% of Americans own a smart-phone
About 57 million Tablets were sold in 2015

The average social media user spends over 1 hour, accessing social media account(s) per day

What does this mean for eDiscovery and legal cases?

Responsive data is everywhere. The courts and law firms are taking notice and taking action.

The use of eDiscovery and managed services in law firms doubled between 2012 and 2014

80%

of law firms plan an increase in investment on data culling tools

1/3 of law firms plan eDiscovery investments
